Diving Assistant

DIVEVOLK

DIVEVOLK wearable Smart Diving Assistant system is based on the powerful Smartphone hardware platform, combined with self-developed software app, bringing a brand new experience to divers.
The system includes:
SeaTouth™, SeaLight™, SeaHear™, DiveHelper™ and divers' own Smartphone.

SeaLight™
Multimode/ controlled lighting
SeaHear™
Audio output
DiveHelper™ app
Unlimited expansion
SeaTouch™
Touchscreen control
Divers' own Smartphone
Currently applicable to Iphone6/7/8
DIVEVOLK
Smart Diving Assistant
Brand New Experience
Human-computer interaction: touch screen input and audio output.
Fully access to all functions of the Smartphone (Except for underwater wireless communication).
An open ecosystem is built based on the system. Unlimited number of safety related and fascinating diving apps can be developed with the system.
User friendly. Compact design and the lightweight suits for all divers.
SPIRI

01

SeaTouch™

SeaTouch ™ is more than just housing for Smartphones for underwater photography. It brings you brand new diving experiences with unique safety functions and a stylish design.

General Specifications

Depth Rating	40m / 131ft (suggested use) 50m / 165ft (waterproof tested)
Weight	100g ± 10g
Screen Touch Life	100,000 times
Button Press Life	100,000 times
Product Testing	Waterproof test, Chemical corrosion test Drop test , Impact test, Packaging test, etc.
Certification Standards	ROHS, IPX8
Warranty	1 year
Color Choice	Black, White, Pink
Dimension	163mm x 76mm x 25mm

Superior Performance

Robust Security

Compact Design

The IsoAir™ proprietary technology ensures the compact and agile design. The housing's weight is only 110g! Say goodbye to heavy photography device, and only dive with fun!

Fully Touchscreen

The DiveTouch™ screen allows full access to all the functions of your Smartphone through touch screen operation, only except for the underwater wireless communication. The profiling design enables you to use all the original buttons of your Smartphone. Instant upload and sharing is achieved, while battery and overheating are no longer an issue.

Dual Lenses

Rear lens and built-in optical selfie lens are equipped with anti-reflective coating to ensure the good light transmittance.
An M27 fine threaded glass lens port is available for other lens options.

Erase Worries On Smartphone Safety

Distinct EasySeal™ design, which includes a small opening, 2-point lock and 3-point fixture, and the ingenious air bag pretest system further guarantee the underwater safety of your Smartphone so that you can forget your worries.

Emergency Contact

Emergency call and SMS provide extra protection in special situation. The touch screen operation brings this possibility to reality.

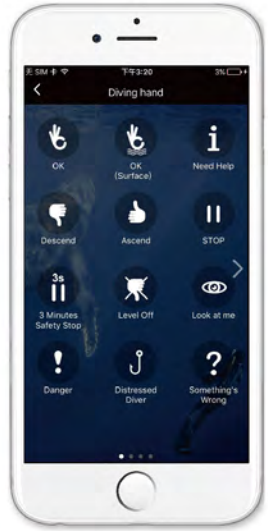
Versatile Usage Scenarios

IPX8 Waterproof, Shockproof and Dustproof. Suitable for more extreme outdoor environments: waterproof in swimming pool, hot spring, rain and snow, dustproof in desert and thermal insulated in cold area.

02

DiveHelper™

Not competent to operate bulky professional equipment, while annoy that the best moments could not be recorded?
Indulge in the scenery, and neglect the air remained?
As a new diver, forget important diving signals?
DiveHelper™ app brings you great diving experience while make you feel at ease.



Powerful Photography

Convenient access to auto photo, manual photo, video, SLO-MO, time-lapse and much more by sliding a finger across the screen.

Slide the screen to adjust the ISO (20-700), the exposure speed (1/2S-1/300S), the white balance (2700K-6500K), and zooming in and out, which works even better than the color correction filters for accurate underwater colors. Clear and bright numbers are easily read, even in dark and murky waters.

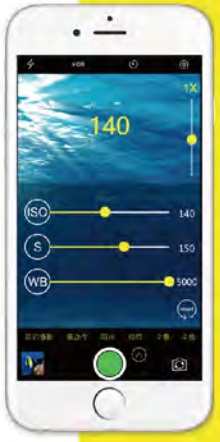
One-key color restore function ensures sharp, clear images in every shot.

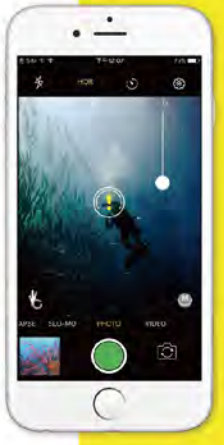
Exclusive Safety Audio Alarm

Underwater voice alerts allow divers to know current operation and mode without looking at the screen, which reduce the risk of improper operation.

SPG checking reminder can be set from a safety perspective.

Diving signals are accessible for the divers whenever needed.





One Key Color Restore Comparison

Before correction → After correction

03

SeaLight™

SeaLight™ is maybe the world's first underwater strobe and torch that is specially designed for Smartphone housings without any handle tray. Even new divers can easily operate!

General Specifications

Brightness	Continuous light	Max 800 lumens
	Strobe light	Abt. 1200 lumens
Depth Rating	40m / 131ft (suggested use)	
	50m / 165ft (waterproof tested)	
Beam Angle	On land	100 degree
	Underwater	90 degree
Color Temperature	5000 ± 200K	
Power Level:	Three Grades 100% / 75% / 50%	
Burn Time:	Continuous light mode	Grade 1 approx. 100 minutes Grade 2 approx. 50 minutes Grade 3 approx. 30 minutes
	Strobe light mode	Abt. 2000 times
Elastic Wires Length	70cm/ 27.6 inch	
Battery Type	3.7V/400mAh	
Recycle time	N.A.	
Charging Port	Micro USB DC2.0 X 0.7mm DC 5V	
Charge Time	Approx. 1.5 hours from zero (5V/1A)	
Color	Black, White, Pink	
Dimensions	68mm x 62mm x 27mm	
Weight	50g ± 10g	

Synchronous Flash

The patented SyncFlash™ technology allows you to use the strobe just like a built-in unit; small and convenient. Perfect for macro photography!

Outstanding Light effect

CD textured window to achieve uniform, soft and spotlight effect.

Three modes

Strobe, Torch and SOS signal

The torch's brightness is adjustable and a single charge will last for up to 2 hours, which is more than enough for diving.

Comfortable and Reliable Button

ConsPress™ technology ensures the constant press pressure of the buttons at different depths, completely avoids the button failure under the extreme depth of water.

Compact and Convenient

Made with a unique design with elastic wires in order to easily release and fix the strobe. It allows a distance of up to 70cm away from the smartphone. Synchronous flash from any angle you want in order to avoid backscatter-specks, spots or blotches in underwater photos due to strobe's light reflecting off of particles, sand or plankton.

04

SeaHear™

SeaHear™ maybe is the world's only headphone that can be connected to your smartphone underwater at a depth of up to 40 meters. It will work as an interactive portal for the coming security features and unlimited number of diving apps will be developed based on its function.

General Specifications

Depth Rating	40m / 131ft (suggested use) 50m / 165ft (waterproof tested)
Burn time	Approx. 3 hours
Charging Port	Micro USB
Charge Time	Approx. 2 hours from zero (5V/0.5A)
Connection With Smartphone	Bluetooth 4.0
Certification Standards	CE IPX8 ROHS
Color	Black White Pink
Dimensions	132mm x 95mm x 51mm
Weight	25g ± 5g

High Fidelity Underwater Performance

Proprietary IsoAirII™ technology ensures stable and high performance sound effect, even underwater at a depth of up to 40 meters.

Safer When Ear is Unblocked

The unblocked structure of the audio output port ensures comfort and does not affect the acquisition of external sound, which is safer for divers.

Maximum Comfort

It has an ergonomic design to ensure a comfortable experience. The weight is only 30g, and one charge can last for 3 hours, which is more than enough for divers.

Personalization and Versatile Scenarios

The two types of earplug are designed for diving, swimming, outdoor and other scenarios. Lighting wire for selection, cool and safe.

Underwater voice alert to prevent improper operation and provide extra security.

Smart and Solid– Unique structure and appearance design

Rooted in Diving, but more than diving

Extensive usage scenarios and experience bring you greater value
if you love nature and challenge.

About DIVEVOLK

DIVEVOLK is a high-tech enterprise who designs，manufactures and provides innovative underwater intelligence and safety related device, systems, services and platforms. With our own R & D center, a number of domestic and international patents have been obtained.

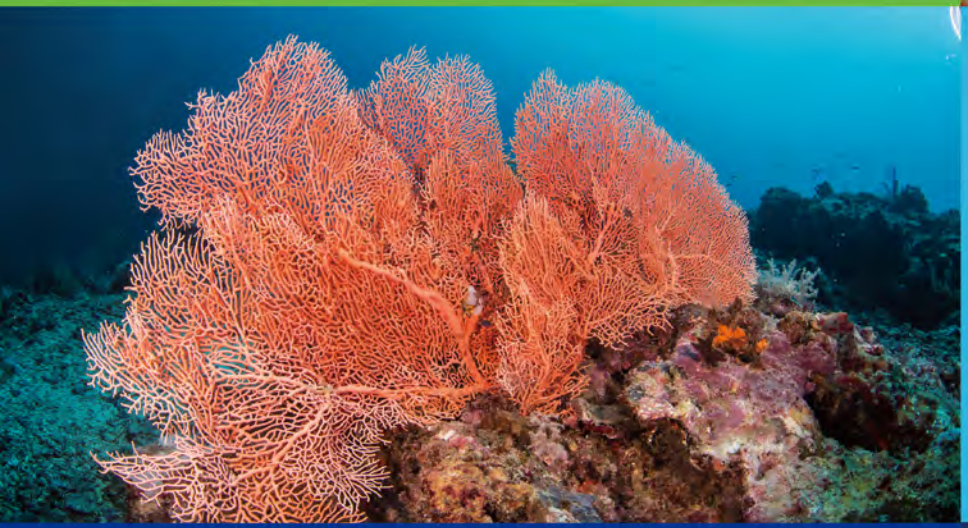
The brand DIVEVOLK is currently registered in the United States, Australia, Malaysia, Japan, Philippines, the European Union (28 countries) and China.

The company is committed to providing customers with brand new underwater experience, come up with an ingenious wearable intelligent diving assistant system. The system is based on the powerful Smartphone hardware platform, combined with self-developed software app, bringing a brand new experience to divers.

The company attaches great importance to patent applications and intellectual property protection, and has been certified by the intellectual property management system.

Our Vision:

Becoming one of the most innovative companies who are committed to bring brand new underwater experience.



Our Mission:

Bringing more fun and safety to divers and water enthusiasts through a multi-functional human-computer interactive device, as well as allowing more people to fall in love with diving.

Our Core Values:

Innovation, Focus and Promise
